

# SOLEIL ECTOR

1 (313) 629-7412 | ectormsoleil@gmail.com | Detroit, MI | <https://www.linkedin.com/in/soleil-ector>

## EDUCATION

---

### MICHIGAN TECHNOLOGICAL UNIVERSITY

Bachelors in *Software Engineering, Business IT Solutions*

Cumulative GPA: 3.11

Houghton, MI

Aug 2024 – Spring 2027

### WAYNE COUNTY COMMUNITY COLLEGE

Associate of Applied Science in *Computer Information Systems*

Cumulative GPA: 3.95

Detroit, MI

Aug 2022 – April 2024

## WORK EXPERIENCE

---

### AMWAY, Inc.

*Software Engineering Intern*

Ada, MI

May 2025 – Aug 2025

- Strategized a more transitional architecture application model, and then developed the internal application, consisting of **React.js**, **RESTful API**, **Enterprise Java**, to supersede sunsetting systems relying on monolithic Springboot architecture
- Aided in new compliance material creation and release for newly integrated technologies, including the strategic use of external artificial intelligence services, for **application security training** and **PCI DSS** compliance
- **Crafted documentation to improve clarity** for existing development workflows and document transitional model process

### AMWAY, Inc.

*Information Security Specialist Intern*

Ada, MI

May 2024 – Aug 2024

- **Aggregated external resources and materials**, pertinent to implemented security applications, into easily accessible, internal documentation
- Security and accessibility assessment of authentication methods across Amway's internal divisions and global markets
- **Aided in testing services and potential artificial intelligence solutions** for improving security posture
- **Evaluated the feasibility of several applications** to enforce **PCI DSS** compliance on an enterprise level of 3,000 workers
- **Assessed authentication activity risks** and researched avenues of mitigating false positive congestion and risk remediation

### Self-Employed

*Wordpress Website Freelancer*

Detroit, MI

Jan 2023 – Dec 2023

- **Effective website development strategy** and implementation for launching business websites in under three weeks
- Engaging **user interface and experience (UI/UX)** designs to grow and retain consumer focus group attention
- **Evaluation and integration of various software vendors** for applications tailored to individual business needs models
- **86% clientele retention** rate for long-term website and product catalog management after initial creation

## PROJECTS

---

### POLIVUE

Sept 2025 – Present

- Uses **Amazon S3**, **Anthropic Claude**, **Microsoft's MCP**, and **RAG** workflow to create standardized compliance reports inspecting documents, code packages, websites, enterprise social media for policy alignment.

### MICHIGAN CHINOOK

Published 2024

- Online educational platform promoting the importance of Chinook Salmon conservation. Implemented using **Python**, **JavaScript**, **HTML/CSS** for dynamic content and database integration availability.

### GOAT BANK

Published 2023

- Simulated banking application providing various self-service features (i.e. SSPR via email, OTP authentication, and privileged resource access) and real-time currency conversions for transactions. Implemented using **Java**, **JavaFX**, and **MongoDB**.

## SKILLS

---

**Programming Languages:** Java, SQL, HTML, CSS, JavaScript, Python

**Frameworks:** React.js, SpringBoot

**Technologies:** AWS S3, Docker, MongoDB, Rancher, Git, Entra ID, Claude API, Oracle Databases

**Certificates:** CompTIA Security +, Oracle Cloud Infrastructure Generative AI Professional
